Quest for Blue seeks its goal both stylistically and tonally. Its tonal centers climb the circle of fifths from B through G \sharp before plunging into the blue waters of e minor. Like all interesting quests, the journey is as important as the goal, and indeed the blues—once achieved—quickly transform into something quite different.

The composer has written the horn part for “Horn in E.” The part is nevertheless intended for a valved horn, just as were the E horn parts of Strauss, Rachmaninoff, and others. Many contemporary double horns can easily and inexpensively be pitched in E/A simply by replacing the main tuning slide with a specially-constructed slide that is longer by the length of the B \flat second valve loop. (The valve slides and F tuning slide must then be adjusted proportionately.) The composer believes this to be an intriguing possible way to perform the piece, however he recognizes that most players will play the part on their unaltered F/B \flat horns. A transposed part for Horn in F is provided as a practical aid.

The horn’s bass clef notation is “New Notation.” Thus, in the score and E horn part, all notes sound a minor sixth lower, regardless of clef. In the F horn part, all notes sound a perfect fifth lower regardless of clef.

duration ca. 13 minutes
